

New savings on Rx you take regularly

Finding ways to keep your medication costs affordable is our top priority. That's why your prescription benefit plan includes the High Deductible Health Plan (HDHP) – Health Savings Account (HSA) Preventive Drug List. It gives you an easy way to save on medications you take every day (such as high blood pressure or asthma medication).

How do I save money?

You'll pay your plan's applicable copay* for medications on the Preventive Drug List – even if you haven't met your plan deductible yet.

Is it complicated?

Not at all. Your pharmacy will automatically charge you your plan's applicable copay when you fill any medication on this list. If a medication you take regularly is not on the list, just ask your doctor if a listed medication might be right for you.

Want to see if your Rx is on the list?

You can view The Preventive Drug List at <https://employeebenefits.ri.gov>.

You can also use the Check Drug Cost tool to see medication costs.

* Copayment, copay means the amount a member is required to pay for a prescription in accordance with a Plan, which may be a deductible, a percentage of the prescription price, a fixed amount or other charge, with the balance, if any, paid by a Plan.

Your privacy is important to us. Our employees are trained regarding the appropriate way to handle your private health information.
