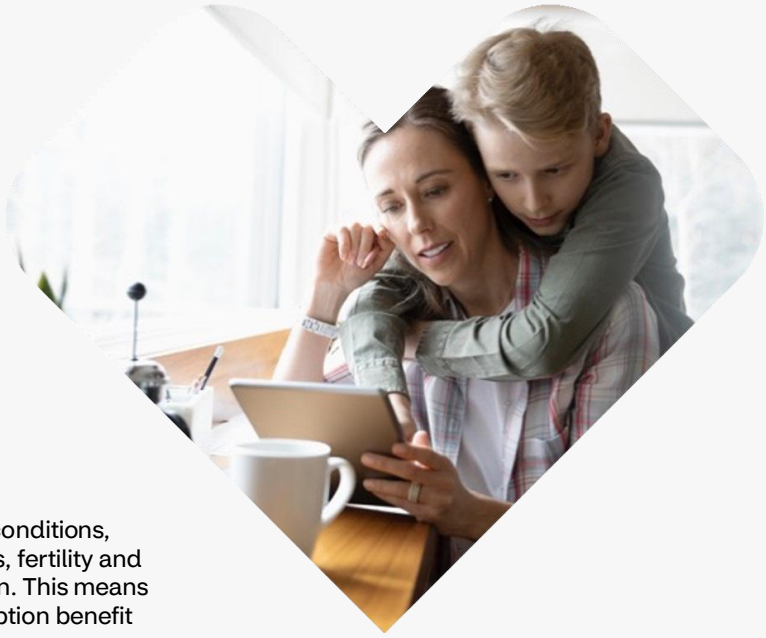
CVS caremark®



Specialty medication support just for you

What are specialty medications?

Specialty medications are used to treat complex or chronic conditions, such as rheumatoid arthritis, psoriasis, rare genetic disorders, fertility and cancer. Most specialty medications require prior authorization. This means you must meet your plan's requirements before your prescription benefit plan will cover the medication. Learn more at **CVSSpecialty.com**.

Visit Caremark.com to manage your prescription benefits

Find a participating specialty pharmacy
Use the *Pharmacy Locator* tool to search for participating specialty pharmacies.

Check and compare drug costs
Use the *Check Drug Cost* tool to compare prices across in-network pharmacies and identify possible savings options.

Convenient medication delivery
Select participating specialty pharmacies can deliver your medication anywhere nationwide, even if you're on vacation. Or you can pick it up at certain participating retail pharmacy locations.* Call the pharmacy to see what options are available to best suit your needs.

Personalized support

Participating specialty pharmacies may provide trained pharmacy teams who can help you understand your medication, stay on track with treatment, and navigate your prescription benefits. Call your pharmacy to learn more.
